# Introduction
## Overview
Annotation Case manipulates the alphabetic case of the characters displayed by attributes, dimensions, mtext, and text objects, allowing you to change between *lowercase*, *Mixed Case*, and *UPPERCASE*.

## Compatibilty
This version of Annotation Case is compatible with any AutoCAD 2000i-based product.  For versions compatible with other Autodesk products, visit our web site at www.powerlisp.com.

## Evaluation License
PowerLISP Solutions grants an evaluation license which allows you to use and evaluate this program for a period of thirty (30) days at which time the program will cease to function.  Use of the demo version of this program in excess of this evaluation period is in direct violation of United States copyright law and international treaties.  If you desire to continue using the program beyond this length of time, you are required to register and pay for an End User License.  Use the order form included in this manual.

## Warranty
This software and manual are sold "as is" without warranties from PowerLISP Solutions as to performance of merchantability or any other warranties whether expressed or implied.

PowerLISP Solutions shall under no circumstance be liable for any damages, including but not limited to: loss of profits, loss of time, loss of data, business interruption resulting from the use of or the inability to use this software.  The user assumes the entire risk of using this program.

## Trademarks
AutoCAD, AutoLISP, ObjectARX, and Visual LISP are registered trademarks of Autodesk, Inc.  Adobe, Acrobat, and the Adobe logo are trademarks of Adobe Systems Incorporated.  Microsoft, Windows, Windows 95, Windows 98, Windows 2000, and Windows NT are registered trademarks of Microsoft Corporation in the United States and/or other countries.  All other brands and product brands are trademarks or registered trademarks of their respective owners.

## Installation
To install Annotation Case, copy the file *case.vlx* to AutoCAD's support folder, e.g. C:\AutoCAD 2000i\support.

## Loading
Annotation Case is a Visual LISP Executable.  It may be loaded in the same manner as an AutoLISP program.  Refer to the online help for additional information.

# Using Annotation Case

Once Annotation Case has been successfully loaded, type **case**↵ at the AutoCAD Command Line. Annotation ase prompts:

*Specify an option [About/Exceptions/Lower/Mixed/Upper] <Upper>:*

See the following for explanations of each option.

## About

Displays information about the program.

## Exceptions

Use the Exceptions List dialog (shown at right) to create a list of words that will appear as you specify regardless of the case used to convert the text strings. A list may be created for each of the three cases and need not contain corresponding entries. Each list may contain a maximum of 50 exceptions.

## Lower

Causes all the alphabetic characters in the selected annotation objects to be converted to lowercase, subject to the lowercase exceptions list, e.g. (this is lowercase.)

## Mixed

Causes all the alphabetic characters in the selected annotation objects to be converted to mixed case, subject to the mixed exceptions list, e.g. (This Is Mixed Case.)

## Upper

Causes all the alphabetic characters in the selected annotation objects to be converted to uppercase, subject to the uppercase exceptions list, e.g. (THIS IS UPPERCASE.)

# Annotation Case Revision History

This history is provided for the registered users of older releases to assist them in quickly considering an upgrade.

## Version 4.0 (January 21, 2001)

- **Improved word recognition**
  Words contained within braces, brackets, parentheses, and quotation marks are recognized and converted correctly when mixed case is used.
- **Exception lists**
  Added the ability to create exception lists for each case.
- **New documentation format**
  Users' Guide provided in Adobe© Acrobat© Reader format.
- **Re-released**
  Made available as an individual product as well as with Annotation Suite.

## Version 3.0 (November 14, 1999)

- **Added support for Attribute and Dimension objects**
  Added ability to convert block attribute and dimension object's text strings.
- **Renamed Annotation Case**
  Renamed because it supports more than simple text objects.
- **Merged with Annotation Suite**
  Discontinued as an individual product and made available only with Annotation Suite v1.0.

## Version 2.2 (May 27, 1999)

- **Enhanced license agreement**
  Displayed license agreement in dialog box for user to accept prior to evaluating demo version.

## Version 2.1 (September 21, 1998)

- **Updated documentation**
  Reorganized and simplified documentation and order form.
- **New documentation format**
  Provided documentation in both ASCII text and Word97 format.

## Version 2.0 (November 27, 1997)

- **Added mixed case option**
  Added capability to convert text strings to mixed case (First letter uppercase, remaining characters lowercase in each word.)
- **Added mtext support**
  Added the ability to convert new mtext objects.

## Version 1.0 (June 15, 1993)

- **Initial release**

# Uninstalling Annotation Case

To safely uninstall Annotation Case v4.0 delete the following files.

- case40c.zip
- case.pdf
- case.vlx
